We were on the fence all winter about whether or not 44D should be offered for sale this spring or held over to sell as a two year old in 2018. Since he was a March 5 baby, we decided to hold him over. However, many visitors to the pen over the last few weeks complimented how he should be included in the sale... then the other day, after he passed his BSE with 93% at just 11 months of age, we were convinced to offer him as an added lot. 44D is as dark red as you will find, heavy haired, and has an exceptionally calm disposition. He has a wide top, lots of depth of rib and good length. This calf walks very smooth and free. His dam is great uddered and has been a consistent producer for us, raising one of the top bulls in our sale last year and one of our most powerful heifer calves this year. Don't overlook 44D because of his age. He has performed equally as good or better than the Jan/Feb bulls in the pen, and also out tested some of them in the fertility department too. Take advantage here.
