HOW THE ONLINE AUCTION WORKS

This auction will OPEN at: 8:00 AM PST on Thursday, May 5, 2016
There will be a LIVE CLOSEOUT at: 6:00 PM PST on Tuesday, May 10, 2016

To bid on a lot, you must click on their sale lot number to view the lot. The “Current Bid” is displayed as well as the “Next Bid” price. If you want the lot at that “Next Bid” price, simply click on the “Click to Bid” button. The screen will automatically tell you if “You Are In” or if “You Are Out”.

PROXY BIDS: Using a proxy bid allows you to enter your maximum bid and the system will automatically bid on your behalf, up to your set maximum. The system will compare your bid to other registered bidders and will only use as much of your maximum to obtain the highest bid at that time. If the lot sells for less than your maximum bid, you will only pay that amount. If another bidder has a higher maximum, you will be outbid and the system will say, “You Are Out”. But if you have the highest maximum you will win the final bid. Using a proxy bid means you don’t have to come back to the computer to re-bid every time another bid is placed. You can also use a proxy bid during the final close-out if needed. Your maximum bidding amount is kept confidential from other bidders and the seller; only you can see it on the screen.

FINAL BIDDING/CLOSE-OUT PROCESS: Close-out bidding begins at 6:00 PM (PST) on May 10, 2016. At 6:00 PM, lots will then be sold (in an auction format) one after another until all lots have been sold. The close-out process is your last chance to bid on each lot. You can use proxy bidding if you cannot make the Live Close-Out.
