

LOT 8

LOOK CLOSELY!!!

These genetics have never been introduced outside of our farm.

The world record buck **SUDDEN KING** was tragically injured when running the herd through the barn. ***On March 16 he died.***

An extremely calm and healthy buck with extremely big pedicels.

We were fortunate to have him as our leading sire for 3 years.

In replacing this lot we are offering choice yearling buck out of **SUDDEN KING**; 14 to choose from.

In the fall if you would like we have two bucks kept back for breeders, you could pick from.

They are and will be big and typical.

Choice doe fawn out of him this fall or yearling doe out of **SUDDEN KING**. There are many to choose from.

EXAMPLE:

Twin sister to Thunderwood1 is bred world record.

Express daughter also bred.

Thunderwood 1's mother is bred.

Many to choose from that will more than likely be a new world record.

EXAMPLE:

Thunderwood 1 was 615" produced us beautiful 400" deer @ 3

These deer will get big.

615" and 696" together have got to be able to produce big, big deer. That's what you have to choose from.

Lot includes a buck and doe, 80 straws of semen out of world record buck.

You breed big, big, you always get big, big

Note out of 3,000 buck hunts that we had the highest dollar bucks sold for shooters were out of our 600" deer that we raised.
